**Subject: FlatWrap HP – Rustic barnwood cladding applications**

To Whom It May Concern:

This letter is to address the installation of FlatWrap HP housewrap in a rustic barnwood (or similar style) siding design. In this installation, we recognize some areas of FlatWrap HP could be exposed (for the life of the cladding system) to weather conditions and UV. While the installation is not included in our published installation instructions, we will approve the application if the project specs below are met:

1. The openings between siding planks are *unintentional* due to inconsistencies in the wood and/or edges
2. For any unintentional openings like gaps or knots, the opening does not exceed 1/8 inch in diameter.

I hope that this information proves useful; should you have any questions regarding the information covered in this document or require any further technical assistance, please do not hesitate to contact me at [techsupport@obdyke.com](mailto:techsupport@obdyke.com) at your convenience.

Best Regards,

George Caruso
